

Cleaning &

MAINTENANCE

Gossen decking is durable and low maintenance. However, it will need some gentle care in order to rid the surface of dust, dirt, and other airborne pollutants. Wash your deck occasionally with a solution of one part bleach and five parts warm water. Rinse with a hose or bucket of water

SCRATCHES

Your deck is a high traffic area, and it should be! Family, friends, and pets will walk miles along its surface. If you notice light scratches on the deck boards, dab a bit of Soft Scrub® with Bleach Cleanser onto a soft, damp cloth, and then gently wipe away the scratch.

SPILLS

For spills such as grease, grime, oil, and wax, spray on Krud Kutter® and scrub with a soft, damp cloth. Krud Kutter® is non-toxic and biodegradable, so it is good for your deck and the environment!
