

*Easy Plug Installation System.
Wiring Simply Plugs Together.*

ILUMA UNDER RAIL LIGHTING

Installation Instructions:

1. Install the power supply with the instructions given.
2. Turn the system on by unplugging the black connector on the white wire and continue with installation. This unplugs the photo eye.
3. Locate where the appropriate length light strips will be mounted.
4. Run the 60" lead down the inside of the sleeve, with the smaller connector out thru the 7/16" hole.
5. Plug the small Y-connector into the micro connector on the 60" lead.
6. Slide the post sleeve over the post with the larger plug hanging out of the bottom or under the deck.
7. Plug the 60' lead from the post under deck to center on the T-cable.
8. Connect the power supply to the first T-cable by plugging the black connector together.
9. Clean the rail with the alcohol swabs provided. Remove the backing of the double back tape and adhere the light strip to the rail.
10. Connect each light strip to the small Y-connector if using two pieces of i-luma.
11. Connect the 10' connector cable into the 5' lead on the T-Cable to continue to the next post and under rail kit.
12. When finished installing all the lights reconnect the white wire to the photo eye from Step 2.
13. Continue to connect all the T-Cables together by plugging in together each harness.

No Wire Cutting
